Art Unit: 2812

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 12-18, 28-39, drawn to process for making semiconductor devices, classified in Class 438, subclass 301.

II. Claims 1-11, 19-27, drawn to a semiconductor device, classified in Class 257, subclass 265.

The inventions are distinct and independent, each from the other because of the following reasons:

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) A different field of search. In the instant case unpatentability of the group II invention would not necessarily imply unpatentability of the group I inventions, for example, gate inslating layer formed by thermal process.

Because these inventions are distinct for the reasons given above and as shown by the above different classifications, the fields of search are not co-extensive and separate examination would be required, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Any inquiry of a general nature or clerical matters or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1782.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to H. Jey Tsai whose telephone number is (703) 308-1374. The examiner can normally be reached on from 7:00 Am to 4:00 Pm., Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Niebling can be reached on (703) 308-3325. The fax phone number for this Group is (703) 872-9306.
